

# IR DIGITAL CONTROL UNIT IRDC-2000

## Description

The newest Exmore IR Digital Control Unit, is a digital controller with ergonomic design and a clear display with touchscreen, for controlling the Exmore Infrared appliances.

For applications where it is convenient to use 1 controller to control 2 infrared units, we can offer the 2-channel version.

Both versions can also be operated via a PC, tablet or smartphone.

- Software-controlled controller with touchscreen display
- Free to choose program names
- Operation possible via PC, tablet or smartphone
- Try-out parameters in test mode
- Monitor production status

## Options:

- Foot pedal switch
